TRAINING THE ELITE OF TOMORROW

Abrasive Wheels Training

This course is aimed at anyone who uses abrasive wheels, or employs people who use abrasive wheels as part of their work.

There are a wide range of tools and processes that use abrasive wheels and ensuring these are used correctly and safely is of paramount importance. Applications range from hand grinding to disc cutting. They can be used at all stages of a work process, for making preliminary cuts and scores in materials, or for fine polishing and finishing.

Different wheels will have different properties and characteristics suitable for particular tasks. They also have different weaknesses and can pose different risks and hazards in handling and use. For this reason, it's important that you always select the right abrasive wheel for the job and use it with the right machinery.

This course covers the anatomy of an abrasive wheel, the dangers associated with their use, Storage and handling and much more.

Module Number	Module Name	Pass % Required
1	Introducing Abrasive Wheels	70
2	The Anatomy of an Abrasive Wheel	70
3	The Dangers of Abrasive Wheels	70
4	Abrasive Wheel Safety	70
5	Safe Speeds	70
6	Other Wheel Markings	70
7	Storage and Handling	70
8	Checking and Testing	70
9	Training and Certification	70
10	Inspections	70
11	Course Summary	70

Duration: 100 minutes *(Note: This is based on the amount of video content shown and is rounded off. It does not account in any way for loading time or thinking time on the questions).*

Recommended System Requirements:

Operating System: Windows 7+ or Mac OSX (10.8+)
Browser: A modern and up to date web browser
Video: Up to date video drivers
Memory: 1Gb+ RAM
Additional Software: Flash Player (latest version)
Download Speed: Broadband (3Mb+)
